

Second High Level Meeting of the AEEP

12/13 February 2014, Addis Ababa, Ethiopia

African and European Political and Business Leaders meet to

- Review successes in the African energy sector
- Shape the future of Africa-EU relations in the sector.

The African and EU energy sectors undergo rapid change. With double-digit growth rates in many African countries, the energy sector presents both a challenge as well as an opportunity. Through Africa-EU cooperation, the two continents benefit from working together to improve energy service provision, transfer technology, transform entire energy systems to a more sustainable future and exploit economic opportunities through investments and Africa-EU business cooperation.

The Second High-Level Meeting of the Africa-EU Energy Partnership (AEEP) will take stock of past successes and will shape the future of energy cooperation.

For more information and to sign up for the conference, visit www.aeep-conference.org.

At the First High Level Meeting in 2010, Energy ministers of the EU and Africa agreed on ambitious targets to be reached by the year 2020.

2020 Targets in the framework of the AEEP

Access

to modern and sustainable energy services to at least an additional

**100
MILLION
AFRICANS**

Energy Security

2x

- the capacity of cross-border electricity interconnections
- the use of natural gas
- African gas exports to Europe

Renewable Energy and Energy Efficiency

10,000_{MW} of new hydropower

5,000_{MW}
of wind power

3x the capacity of all other renewables

500_{MW}
of all forms of solar power

Increase energy **EFFICIENCY** in Africa in all sectors
